

# Oversight of Manure Distribution at Confined Animal Feeding Facilities

## The ASK

---

### Oversight of CAFFs

Will you support civil penalties for manure brokers (Certified Livestock Managers) who violate the law?

Will you support a lower allowable manure application level (especially in nutrient-impaired watersheds)?

Will you support requiring state agencies to compel all medium and large CAFFs to file Nutrient Management Plans with their local soil and water conservation districts?

Will you support requiring the Ohio Department of Health to conduct studies examining the public health risks associated with practices common at industrial livestock facilities?
